

Learn Skills is an innovative learning solutions provider driven by a mission to deliver the best technology-based solutions for learning. Learn Skills is headquartered in Ireland but has clients all around the world.

It is a company founded on the belief that at the heart of any successful organization, you'll find a unique combination of excellence, openness and innovation; and most importantly, people that are passionate about learning and delivering value to the end-user. At Learn Skills you will find dedicated and talented individuals that are steadfastly building a leading learning technology solutions provider.

Learn Skills was born out of the belief that in a Knowledge Society, organisational and individual effectiveness depends on the consistent application of learning and a commitment to continuous personal development and lifelong learning. We believe our most valuable asset is our people and our goal is to help everyone learn better, faster and smarter through the use of technology enhanced learning tools and products.

The challenges presented by the Knowledge Society demand even greater collaboration between academia and industry. Consequently, Learn Skills is based at the National University of Ireland in Galway, at the heart of a technology innovation hub. There, the company benefits from the research & development capacity of a leading international University and research institution.
