This e-learning program is designed to raise awareness and help eliminate preventable back injuries. It provides an introduction to Job-specific hazards, Safe work practice and Ergonomics, which is an applied science concerned with designing and arranging things people use so that the people and things interact most efficiently and safely - also called human engineering.

This Programm will help you to:

- Appreciate the extent of back injury problems in the workplace
- Understand the need to identify and control occupational ergonomic hazards
- Define the term ergonomics
- Recognise good practices for reducing back injuries
- Identify safe work practices for back safety
- Identify job-specific hazards
- Understand the need for ergonomic assessments
- Define engineering controls and learn about different types of control

This e-learning course is suitable for self-paced learning, distance learning and blended learning. This is an online training course and uses high quality multimedia with audio to fully engage the user.
