Microsoft Excel 2003 is a powerful tool for generating spreadsheets from a number of data sources. Using calculations and predefined formulas, users can easily manage any type of data, including budgets, financial data, statistical data, and more. To effectively use this powerful tool, however, users must know how to perform these tasks. This Microsoft Excel 2003 course combines a powerful spreadsheet application with the user-friendly atmosphere of Windows. This course is designed to help users turn Microsoft Excel 2003 into a truly productive software tool.

This e-learning course is suitable for self paced learning, distance learning and blended learning. This is an online training course and uses high quality multimedia with audio to fully engage the user.
