This course is designed for end users who want to create presentations using Microsoft PowerPoint 2003. This course will be useful for users who want to create a professional presentation, and add different components to it to enhance the visual appeal of a slide show. The course describes the fundamentals of PowerPoint 2003 and introduces its features. It teaches the user to create slides, add graphic and other special effects to the slides, organize the content and slides in the presentation, run a presentation, and print a presentation.

This e-learning course is suitable for self paced learning, distance learning and blended learning. This is an online training course and uses high quality multimedia with audio to fully engage the user.
